

Student Onboarding & Allocation Workflow

From admission to dual-support learning — teams, advising, tutoring & feedback

Process reference document

This workflow describes how a new student moves from **admission** through **team allocation**, **advising**, and into **individual classes** with a dual-support model, closing with a **rating system** for the people who serve them. Roles are colour-coded below.

● Sales Team

● Team Manager

● Team Advisor

● Tutor

● Student

1

PHASE ONE

Admission & Initial Team Allocation

SALES TEAM

Admission

The Sales Team processes a new student admission.

HUBSPOT

HubSpot Intimation

Admission data is pushed to HubSpot, which sends an intimation to the Team Managers and Team Advisors.

ALLOCATION

Round-Robin Team Assignment

Students are assigned to teams in round-robin order (Student 1 → Team 1, Student 2 → Team 2, ... up to Team 4, then the cycle repeats).

HUBSPOT

Ticket Creation

A ticket is automatically raised for the newly allocated student to initiate the enrollment process.

2

PHASE TWO

Onboarding & Advising

TEAM

Introductory Call

The assigned team contacts the student for an intro call to explain course details, policies and criteria.

TEAM ADVISOR

Advisor Allocation

A specific Team Advisor (from a pool of 3–4 advisors under the Team Manager) is allocated to the student.

TEAM ADVISOR

Primary Point of Contact

The advisor owns the student's general care: feedback collection, follow-ups, and resolving issues.

STUDENT

Common Classes

The student begins by attending common, live online group classes.

Transition to Individual Classes

TEAM ADVISOR

Gathering Preferences

When the student is ready for individual classes, the advisor collects preferences: preferred class time, male/female tutor preference, and fixed vs. flexible working hours.

TEAM ADVISOR

Manager Intimation

The advisor sends the collected preferences to the Team Manager.

TEAM MANAGER

Tutor Allocation

Based on the preferences, the Team Manager allocates an appropriate Tutor to the student.

TUTOR + ADVISOR

Dual Support System

The student now has two direct contacts: the Tutor (academic classes) and the Team Advisor (ongoing updates & support).

Feedback & Rating System

Students provide ratings for all three key people in their journey, keeping accountability and service quality visible to managers.

Team Manager

Team Advisor

Tutor

System support status. In the current LMS build, the following are implemented: HubSpot contact display & enrollment with e-mail intimation to managers/advisors, configurable **Teams**, **manual** assignment of student → team/advisor/tutor, role-scoped portals, and the student **rating system** (1–5 stars + comment for Manager, Advisor & Tutor). Planned / not yet automated: round-robin allocation, HubSpot ticket creation, and preference-based tutor matching. Per policy, **HubSpot is read-only** — the app never writes back to it.
